

Your State-by-State Guide to Mesothelioma Care

Mesothelioma is an aggressive form of cancer caused by exposure to asbestos. Each year, about 3,200 patients are newly diagnosed in the U.S.

Because mesothelioma is a rare and complex disease, it is essential to seek care from hospitals and specialists that are familiar with the latest treatments and clinical trials. We've compiled this list of mesothelioma treatment centers by state, which may help in your research.

When you meet with your doctor, make sure to provide your work and military service history. This information could play an important role in determining your asbestos exposure and confirming your mesothelioma diagnosis and any compensation to which you may be entitled.

Companies that manufactured asbestos-containing products knew about the dangers of asbestos, but continued to produce and sell these harmful products. In short, they put profits ahead of people. For many manufacturers no longer in business, special court-ordered trusts — estimated at over \$30 Billion — have been set up to provide compensation for mesothelioma victims and their families.

Medical treatment is expensive. Pursuing a legal claim may help you and your family secure the financial support that could help with medical expenses, lost wages, and other important living expenses.

Sokolove Law is a trusted mesothelioma law firm, and a leading provider of legal services that helps victims of asbestos exposure file asbestos claims. For more than 30 years, Sokolove Law has helped bring justice and compensation to thousands of mesothelioma victims — and their families.

Call Sokolove Law today, toll-free, at **866-469-2752** or fill out our easy form on **SokoloveLaw.com** to receive a FREE, no-obligation legal consultation.

This resource list is updated on a regular basis. Please contact Sokolove Law toll-free at **866-469-2752** for the most recent version.
